

3SEE – 4K HD USB Speaker/Microphone Camera

Enterprise grade all-in-one workspace collaboration solution

The 3SEE 4K HD USB camera is **ideal for remote classroom instruction, small huddle spaces and remote/home office users** who need an all-in-one audio/video collaboration device. Optimized for personal workspace use, the 3SEE connects via USB 3.0 using a single cable (included) for both audio and video.

It features a 4-microphone full-duplex digital array with **Acoustic Echo Cancellation (AEC)** and

Automatic Noise Suppression (ANS), allowing a voice pickup range of up to 30 feet for roaming freely around your workspace. A pair of 2W integrated speakers also eliminate the need for an external speaker.

Featuring a **low-light imaging sensor** with up to 4K HD resolution, 8MP lens, and a 90° Field of View (FOV) users can look their best for any meeting. The **no-slip adjustable mount** allows for mounting on both thin laptop screens as well as thicker external displays. At just 7" wide and 2" deep, it is **real-estate friendly and travels well**.

Resolutions from 640x480 up to 3840x2160 are supported to provide a broad range of video quality to best fit your **video conferencing or Unified Communication (UC) platform**. Your work from home experience has never been this seamless – just plug in the 3SEE and get to work faster, with fewer hassles.
