

# VDOUHS – USB/3.5mm Headset

Professional headset features HD digital voice and multiple connection options

The VDOUHS headset is **ideal for call centers, distance learning classrooms and home office users** who need audio isolation while working in a shared environment. A noise-cancelling microphone and built-in audio-loop feature will help to protect your hearing during long-term daily use.

With your choice of **USB or 3.5 mm connection in a single unit**, the headset can be used on a variety of computer devices and is ideal for use with **video conferencing applications such as Zoom, Microsoft Teams, Google Meet** and others. With dual ear-muff design, the VDOUHS eliminates fatigue and is comfortable for all-day use.

The spring-metal headband offers durability and inline controls make this headset long-lasting and easy to use. It's **noise-canceling microphone** ensures that the world around you won't interrupt meetings, conference calls, presentations, or whatever your day throws at you. With less bulk and sleek functionality, the VDOUHS is the perfect headset for everyday use.
